DEVICE PARITY CHECK

Desktop vs. *Mobile Verification*

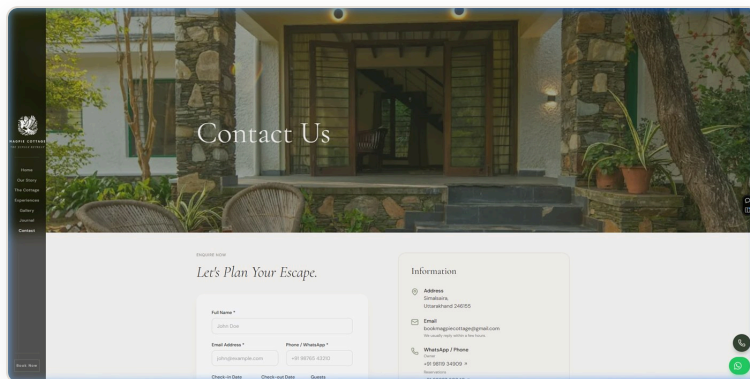

All changes were tested and confirmed across both desktop and mobile screen sizes. The website looks and behaves correctly on every device.

Mobile Homepage — 390px viewport

Note on Desktop vs. Mobile

The feedback document was primarily written for the mobile version of the site. Because the website uses a responsive design system, **all text changes (Title Case, alignment, testimonials, House Rules, etc.)** automatically apply to both mobile and desktop simultaneously. No desktop-specific re-work was needed for text changes.

Minor Outstanding Item

The label **"GETTING AROUND:"** on the homepage contact/location section is still displaying in uppercase. This is a small remaining item that can be addressed in the next update cycle.
